

# Ideaclouds

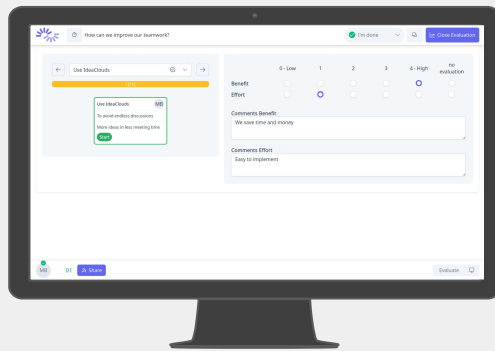

Manual for Facilitators

# The IdeaClouds collaboration approach:

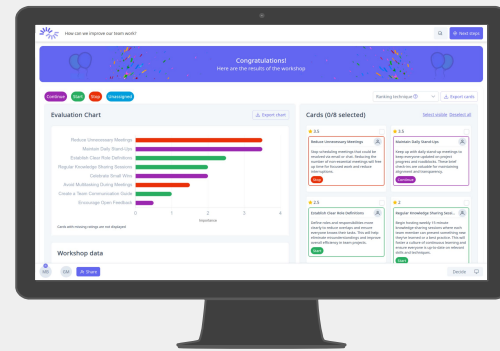

## 3 steps to better team results

**1. Brainstorm ideas**  
in real-time collaboration

**2. Evaluate ideas**  
using evaluation methods

**3. Get results**  
Based on analysis of evaluations

### Only people with access

Access needs to be granted to named users.

Insert email addresses

Add

Max 30 users can participate in your workshop at the same time.

### People with access

Grant access to others! Right now, only you have access.

 Copy link

Invite participants

### Choose an access mode:

#### A) Only people with access:

The facilitator grants access by adding the participants' email addresses. Unregistered participants will receive an initial password via email.

#### B) Registered users with link can join:

You can identify the participants by their email addresses. But you don't need to invite participants by entering their email addresses.

#### C) Anonymone with link can join:

Participants don't need to register to join the workshop. However, this option is not available on every enterprise platform.

# Planning, Rules, and Best Practices

# Example of a Workshop Agenda

1. **Introduction:** The facilitator explains the workshop topic and approach. (10 min)
2. **Onboarding:** The facilitator demonstrates the basic functionality of IdeaClouds. (3 min)
3. **Brainstorming:** Participants generate ideas collaboratively. (5 min)
4. **Clustering:** Participants group ideas with related or identical content. (5 min)
5. **Categorizing:** Participants assign cards to categories (5 min)
6. **Evaluation:** Participants rate ideas privately. (5 min)
7. **Discussion:** Participants analyze the results using the diagram and ranking system. (5 min)
8. **Check-out:** The facilitator selects the top ideas and export them, e.g., to Excel. (5 min)

~60 minutes in total

# The IdeaClouds workshop facilitation rules:

1. **Focus on one task at a time** — Don't overwhelm the participants. Go step by step!
2. **Reduce group size** — The more participants, the lower the participation.
3. **Keep it easy** — Don't waste valuable time with long onboarding or training sessions.
4. **Avoid distractions** — The eyes should be on the content, not on the tool or the facilitator.
5. **Contribute silently** — The group should remain silent for at least 5 minutes.
6. **Protect ideas from premature criticism** — Separate idea generation from idea evaluation.
7. **Avoid bias & peer pressure** — No one should see the ratings of others. Democratic voting!
8. **Provide usable documentation of results** — It should be digital and well-structured.
9. **Follow-up quickly** — to capture participants' ideas / generate solution ideas / get feedback.

# What should be explained to the participants?

- The workshop consists of **three phases**: 1. Brainstorming, 2. Evaluation, 3. Results.
- Log in with your **real full name**.
- **Time boxing**: We have limited time!
- **Double-click** to create a new card, enter a title, or edit text.
- Brainstorm and evaluate **silently** (avoid discussions).
- **Formulate ideas clearly** – they must be easy to understand!
- Each card should contain **only one idea**.
- Each card should include a **concise title**.
- **Questions** should be asked exclusively in the IdeaClouds chat.

# What should be done to avoid process losses?

- **Bias / Peer pressure** → Evaluate ideas individually, separate from others
- **Fear of criticism** → Contribute anonymously
- **Killer phrases** → Separate idea generation from evaluation
- **Production blocking / Dominance** → Collaborate silently in real time
- **Social loafing** → Form smaller teams (3 to 10 participants)
- **Zoom fatigue** → Turn video off and reduce visual stimuli
